## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

**Applicant is requested to send in a complete translation of EPO 2000-186616.**

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EPO 2000-186616. Note that the thixo-cast method is synonymous with thixoforging, and thixoforging, by definition involves heating a billet to an intermediate temperature between its solidus and liquidus temperature.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over EPO 2000-186616 in view of Nigro et al (6,112,715). EPO 2000-186616 shows everything except utilizing lugs formed by stirrup pieces and ribs. Nigro et al teach that it is old in the art to provide lugs formed by stirrup pieces 30 and ribs 33. It would have

Art Unit: 3747

been obvious to one having ordinary skill in the art to modify EPO 2000-186616 by employing lugs formed by stirrup pieces and ribs, in order to provide a more light-weight, yet still strong and sturdy piston.

Claims 6-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over EPO 2000-186616. Note that thixoforging is commonly used with a wide variety of elements, including those listed in the above claims. Thus, it would have been obvious to one having ordinary skill in the art to utilize the elements cited in claims 6-14, as these are art recognized alternatives, known for the same purpose.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
